To whom it may concern:

I am writing this letter to recommend Cellular Solutions Signal Enhancing Specialists, LLC. In March of 2010, Cellular Solutions was awarded the In-Building Cellular Repeater contract for the Enloe Medical Center in Chico, CA. I was extremely pleased with the work performed by Cellular Solutions, which was carried out in a timely and professional manner from the design phase through implementation.

This project included implementing equipment on the roof-top and throughout our entire facility and Cellular Solutions was able to perform the work in the time frame we had allocated with very limited interference to facility activities. Thanks to Cellular Solutions we were able to rectify our communication problems within the building with ease. I would highly recommend their services to anyone experiencing issues with cell phones within their building.

Sincerely,

Binda Mangat
