

February 14, 2011

To whom it may concern:

Renown Regional Medical Center had contacted several vendors back in 2008 in search of a wireless infrastructure to enhance signal for multiple cellular providers throughout approximately 200,000 square feet of our Medical Center. After careful evaluation of the proposed vendors, Cellular Solutions was chosen to complete the work on-site due to experience, price, professionalism, and customer service.

From the date of approval, this project was gratefully expedited by Cellular Solutions' personnel and they implemented a fiber-based repeater solution to provide seamless coverage throughout the required areas of our facility. Implementation of the Cellular Solutions system has enhanced Physician satisfaction, a key element to our success as the premier healthcare provider in Reno, Nevada.

Sincerely,

A handwritten signature in black ink, appearing to read "Cyndia Fernandez", with a long, sweeping horizontal line extending to the right.

Cyndia Fernandez
